Hack-N-Stack: Code the Future

Java Full Stack with AI: Learning Hackathon 2026

Instructions

- Complete all slides of this PPT with requested data and upload it under:
Problem Statement -> Level 1- >Submission Tab -> Upload PPT tab in the Hackathon Site.
- You can add additional slides to the presentation.
- Existing slides should not be changed/modified.
- Source code must not be more than 10 MB in size.
- Refer to the Snipping Tool guide to record your video: [SnippingToolGuide](#)
- Demo Video to be uploaded to media exchange site-[Accenture - Media Exchange](#).
- Access Media Exchange → Click **Add New** → Select **Media Upload** → Upload your demo video as shown below.

Team details

- *Provide team name and team member details on the next slide.*

Team details

- *Provide team member name and details below.*

Name	Email Id	Career Level	Role/Market

Technical Architecture details

- *Describe on the next slide the frameworks/libraries used across different application layers shown in the diagram.*

Technical Architecture details

FRONT END - <ADD CONTENT HERE>

INTEGRATION LAYER - <ADD CONTENT HERE>

WEB LAYER - <ADD CONTENT HERE>

DAO/PERSISTENCE LAYER- <ADD CONTENT HERE>

DATABASE - <ADD CONTENT HERE>

Software Architecture details

- *Describe on the next slide using diagrams or at least 5-6 sentences the high-level architecture of your solution. E.g. UML diagrams, ER diagram, microservice oriented architecture diagram, design patterns used if any etc.*

Software Architecture details

- *Describe on the next slide using diagrams or at least 5-6 sentences the high-level architecture of your solution. E.g. UML diagrams, ER diagram, microservice oriented architecture diagram, design patterns used if any etc.*

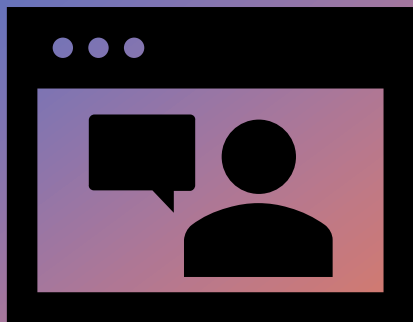

Level -1 Solution Description

- *Describe here the solution details and how it solves the problem statement. Provide a brief on what makes your solution special or different from other solutions.*

Level -1 Solution Description

- *Describe here the solution details and how it solves the problem statement. Provide a brief on what makes your solution special or different from other solutions.*

Level -1 Solution Demo Video

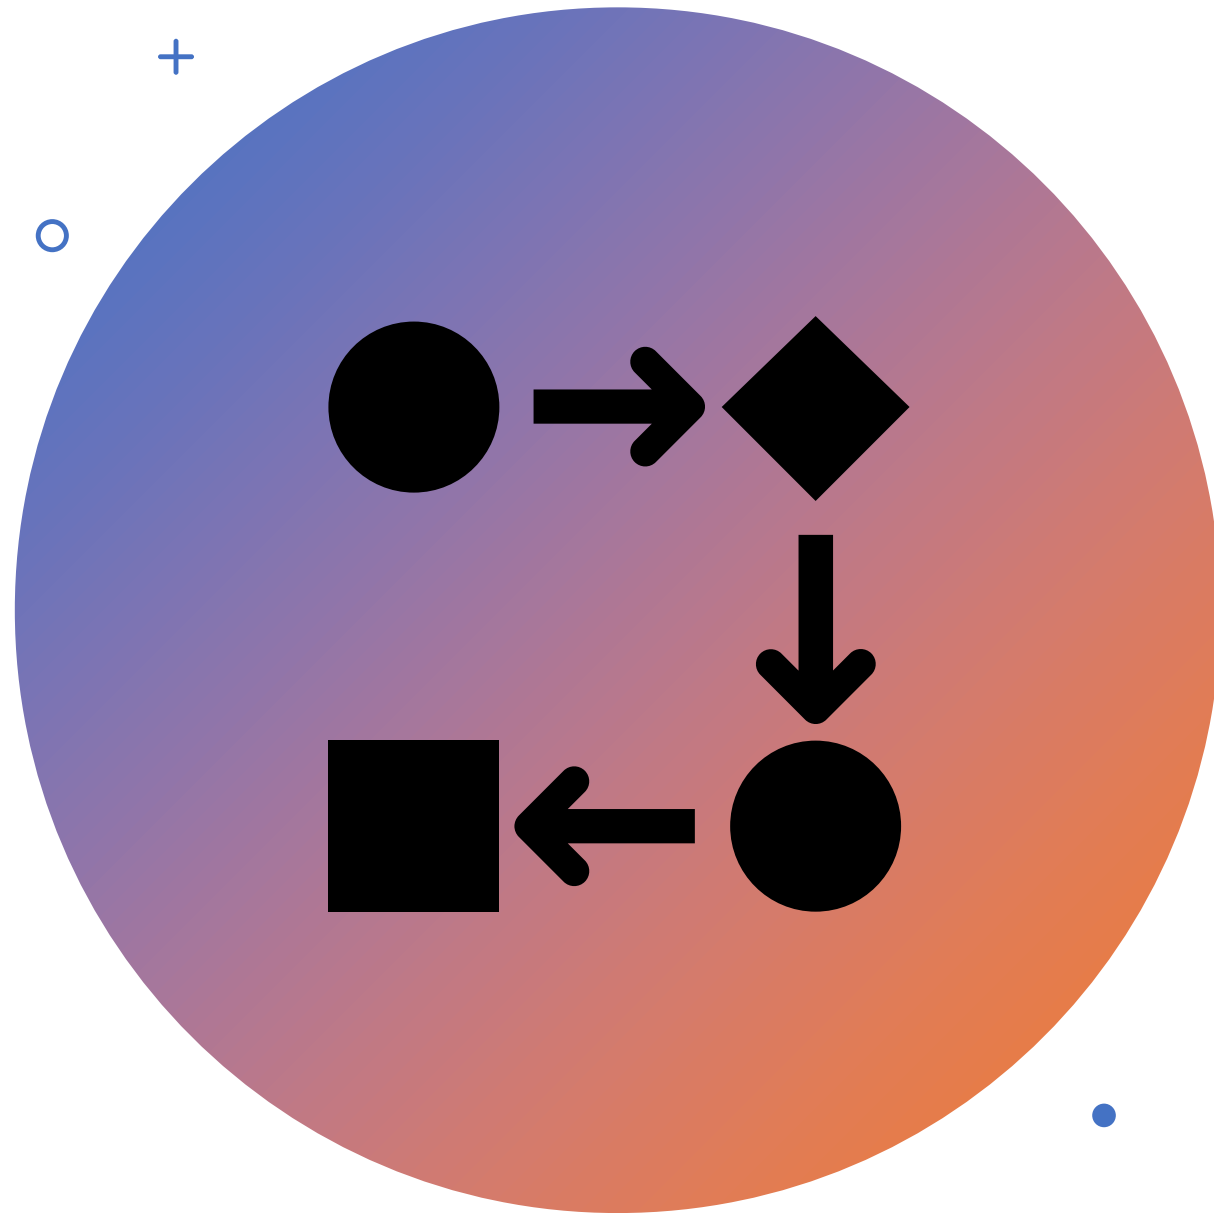

- *Provide a video demo/walkthrough of the solution the solution showing the running application. Video must not be more than 5 mins.*

Level-1 Solution Demo Video

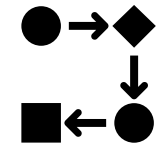

- *Provide a video demo/walkthrough of the solution the solution showing the running application. Video must not be more than 5 mins. Video must be uploaded to media exchange. See instructions slide.*

Workflow and Deployment instructions

- *Provide screenshots of the solution and deployment instructions/dummy data if any .*

Workflow and Deployment instructions

- *Provide screenshots of the solution and deployment instructions/dummy data if any .*

Source Code

- *Upload the solution source code as a zip file to the Hackathon site.*

Source Code

- *Upload the solution source code as a zip file to the Hackathon site. (Max 10 MB)*
- *Upload the source code under the Problem Statement Level 1 -> Submission -> Upload Zip section.*
- *For Java projects please delete everything under **target** folder before upload.*
- *For React/Angular project please delete the **node_modules** folder before upload.*

Additional Data

- *Add any additional important points/artifacts related to your solution here.*

THANK YOU
